Test Plan:- Mozilla Firefox Browser

Test Plan Identifier	TP_01
Introduction	The purpose of this document is to create an application test plan used to browse and download contents and information. The purpose of testing this program is to check the correct operation of its functionality and ease of use.
Test Items	▪ Open application menu ▪ Progress Bar ongoing downloads ▪ Search Bar ▪ Menu Bar options ▪ Home page Applications Icons ▪ Apps shortcut ▪ Tabs ▪ Settings

Features to be tested	▪ Searching of different kinds of contents. ▪ Appropriate result for search. ▪ Secure search result. ▪ Block the hackers messages. ▪ Ensuring Security of search result.
Features not to be tested	▪ View page source ▪ inspect
Approach	• On the test object: ▪ Functional ▪ Non-functional ▪ Compatible ▪ Localization ▪ Security ▪ Usability ▪ Load • According to the requirements ▪ Positive ▪ Negative
Item Pass/Fail Criteria	All test cases with high priority are closed with the result - pass. The test report was compiled and approved by the team lead and customer.
Suspension Criteria and Resumption Requirements	Criterion for interrupting testing ▪ The appearance and entering into the bug-tracking system of blocking bugs. Criterion for continuation of testing Closing the blocking bug in the bug tracking system.
Test Deliverables	▪ Test plan ▪ Test cases ▪ Test report ▪ Defect report

Test Tasks	▪ Writing a test plan ▪ Writing test cases ▪ Writing defect report ▪ Development of criteria for the success of testing
Environmental Needs	▪ Mozilla Firefox Browser ▪ Smartphone or computer or Laptop & Internet Connection.
Responsibilities	Test engineer 1 => ▪ Testing search bar and voice mic ▪ Checking Visibility, layouts and alignment of all sections and its sub-sections ▪ Testing searching and its result. ▪ Testing compatibility of apps on different browsers, different OS and different devices. ▪ Checking load that can be handled by app. Test engineer 2 => ▪ Checking Updates of apps ▪ Checking notification of apps ▪ Testing Incognito Tab ▪ Ensuring full security of app ▪ Tracking changes like languages, currency etc. in apps by change in locations.

Test case:- Mozilla Firefox Browser

1) Functional Testing:

Functional tests determine if a mobile app is following these various requirements and uses. It examines and validates all functions, features, and competence of a product.

Sr No.	TC_ID	TC_Name	Pre-conditions	Test Steps	Test Data Type	Expected Result	Actual Result	Status
01	TC_01	To check whether the browser we use without internet	1)user have an Android smartphone or laptop 2.Mozilla Firefox Browser must be installed in your device	1)Open the browser. 2)Click on the search box 3)open any website and see the result	__	Message should be display ”you are offline.”	Message is displayed “check your network connection”	Pass
02	TC_02	To check whether the all the functions are well in 6.0.5+ version	1)Browser have an internet connection.	1)Open the browser. 2)To check all the options available in the browser.	__	All function should be works well	All functions well	Pass

44	TC_44	To check whether the 'zoom' option available on the browser	1)Browser must be opened mode.	1)Open the browser 2)click on the 'Zoom out' and zoom in option	Click on the option	Zoom in and zoom out function should be works properly	Zoom in and zoom out function are works properly	Pass

45	TC_45	To check whether the 'Help' option available on the browser	1)Browser must be opened mode.	1)Open the browser 2)click on the 'Help' option available on the browser	Click the option	Help releated options should be display on the browser	Help releated options are displayed on the browser	Pass

6) Load Testing:

Load testing is a type of non-functional testing. A load test is type of software testing which is conducted to understand the behaviour of the application under a specific expected load. Load testing is performed to determine a system's behaviour under both normal and at peak conditions.

Sr No.	TC_ID	TC_Name	Pre-conditions	Test Steps	Test Data Type	Expected Result	Actual Result	Status
46	TC_46	To check whether the refresh shortcut	Browser must be present in internet connection	1) Open the Firefox browser 2) Search any website 3) Click on "ctrl+r"	Alphanumeric – mahadbt.com	website page should be refreshed	Website page is refreshed successfully	Pass
47	TC_47	To check whether the reload option	Browser must be present in internet connection	1) Open the Firefox browser	Alphanumeric – msbte.com	Website page should be reloaded	Website page is reloaded successfully	Pass

				2) Search any website 3) Click on reload button				
48	TC_48	To check whether the forward menu	Browser must be present in internet connection	1) Open the Firefox browser 2) Search any website 3) Click on forward button	Alphanumeric – gpmiraj.ac.in	Page should be forwarded to next page	Page is forwarded successfully	Pass
49	TC_49	To check whether the backward menu	Browser must be present in internet connection	1) Open the Firefox browser 2) Search any website 3.Click on backward button	Alphanumeric – Wikipedia.com	Page should go back to pervious page	Page is back worded to previous page	Pass
50	TC_50	To check whether the page load	Browser must be present in internet connection	1. Open the Firefox browser	-	Page should quickly load	Page loads slowly	Fail

Defect Report:- Mozilla Firefox Browser

1. Defect :- User clicks on the home page of the browser curser clicks on this page to no any textfield or text area

ID	**Mozilla-1**
Release Version	106.0.5
Module	Home page
Detected Build version	106.0.8
Summary	User clicks on the browser without any text field then curser displays on screen.
Description	User clicks in the text field then curser is only appear but in current situations curser clicks on anywhere in the browser
Steps to replicate	Curser don't appear to any
Actual result	Accepted
Excepted result	Should not be accepted
Attachment	ss.jpg
Remarks	Please Check
Defect severity	Medium
Defect priority	Medium
Status	-
Fixed build version	106.0.9

2. Defect :- User clicks to the new tab but new tab cannot be open

ID	**Mozilla-2**
Release Version	106.0.5
Module	Home Page
Detected Build version	106.0.8
Summary	User clicks to the new tab but 'new tab' cannot open
Description	At the Browser home page 'new tab' option is available. User clicks on the this button no any effect occurs
Steps to replicate	New tab is not open
Actual result	Accepted
Excepted result	Should not be accepted
Attachment	ss.jpg
Remarks	Please Check
Defect severity	High
Defect priority	High
Status	-
Fixed build version	106.0.9

3. Defect :- Bookmarks website re-add into the bookmarks.

ID	**Mozilla-3**
Release Version	106.0.5
Module	Home Page
Detected Build version	106.0.8
Summary	To 're-add' a website into a bookmarks.
Description	As per rule, re-added option is don't show but it is available and also re-added website into bookmarks
Steps to replicate	New tab is not open
Actual result	Accepted
Excepted result	Should not be accepted
Attachment	ss.jpg
Remarks	Please Check
Defect severity	High
Defect priority	High
Status	-
Fixed build version	106.0.9
